

Copyright is the exclusive right of a person to be recognised (and often paid) as the creator of any piece of work, such as texts, pictures, videos and artwork. This means that if you want to use materials that are copyrighted, you need permission from the creator to use it. This is normally accompanied by payment.

There are also materials online that are not protected by copyright, which you can use in your video. These materials normally use Creative Commons licenses.

### 1 Creative Commons

Creative Commons (CC) licenses are free-of-charge licenses that allow creators to communicate which rights they reserve, and which rights they waive for the benefit of recipients or other creators. There are four conditions under which the author can license his or her work:

**ATTRIBUTION**  
 Others can copy, distribute, perform and remix your work if they credit your name as requested by you.

**NO DERIVATIVE WORKS**  
 Others can only copy, distribute, display or perform verbatim copies of your work.

**SHARE ALIKE**  
 Others can distribute your work only under a license identical to the one you have chosen for your work.

**NON COMMERCIAL**  
 Others can copy, distribute, display, perform and remix your work for non-commercial purposes only.

## 2 Where to find Creative Commons content?

It is not hard to find materials under a Creative Commons license. A good starting point is the website: <https://wordpress.org/openverse/>. This is a search engine which allows you to browse through content (images and audio) released under a Creative Commons license or in the Public Domain.

### Other websites for Creative Commons materials\*:

**Photos:** <https://commons.wikimedia.org>  
<http://www.unsplash.com>  
<https://www.pexels.com/>  
<https://www.flickr.com/>

**Videos:** <http://www.videezy.com>

**Music:** <https://creativecommons.org/music-communities>

**\*Be careful!** Not all the content on 'free to use' websites (such as Pexels or Flickr) is available under a CC license. Always check the original source before reusing.

## 3 How to attribute Creative Commons content?

To attribute works that you reuse under a Creative Commons license you generally must at least include:

1. The title
2. Name of author
3. The URL where the work is hosted
4. The specific license the work is under & a link to the details of the license

### Examples of Attribution

'Colorful Citroen 2CV' by Carel van der Lippe, CC BY-NC-ND

Star by Tom Hall / CC BY

Feeder skip Sirrah by Garitzko / CC0

## 4 Licensing your own video

When you have created a video yourself, it is wise to choose a Creative Commons license so others know how you intend for your video to be shared, and can subsequently reuse your video in a way you agree with.

TU Delft recommends to use **CC BY-NC-SA** which lets others remix, tweak, and build upon your work non-commercially, as long as they credit you and license their new creations under the identical terms. You can download the creative common icons from this site:

<https://creativecommons.org/about/downloads/>.
